----

Experience

Red Hat | Business Systems Analyst Intern | 05/2022 to present
- Created dozens of User Stories and Features in Jira to facilitate the transition from Salesforce Classic to Lightning Experience
- Created and managed multiple dynamic spreadsheets to track, organize, and analyze data
- Coordinated with business interests and IT developers to determine and fulfill the necessary requirements over the life of the project
- Identified, analyzed, and found working solutions to issues in the Salesforce PSA Platform as they arose through the development and implementation processes

CarterJett | Inventory and Analytics Intern | 12/2020 to 08/2021
- Kept track of over 100 product types and shipped thousands of individual product units to Amazon in order to maintain stock levels over multiple months
- Analyzed the selling velocity of product types to determine replenishment times and quantities weeks in advance
- Conducted inventory foreshadowing to determine what and how many products to include in purchase orders months in advance
- Interacted with the Amazon seller interface to download data as well as create shipments and update product quantities in dynamic spreadsheets

Customer Service Positions
